Subject: Re: FW: Rx Integrity reports for the month of May are now available

Hey Brian, so walmart/sams club and giant eagle have stopped filling controls for a local doctor named Frank Veres. This doc has a reputation for prescribing a high number of pain meds. So I think over the past few months we have been picking up a lot of his patients. From our angle, Veres has always complied with our GFD guidelines and his patients are always on time, but the high ratio of controls written has become more obvious. To combat this, Greg and I have discussed not accepting any new controls from his office (since his patients have been displaced from those other pharmacies and the flood of controls is eminent). At this time we still feel comfortable filling controls for our patients that have been coming here for years, but that is subject to change. I would like to hear your thoughts on the matter. Thanks --ADAM

Adam,

Is there a new prescriber in your area for Oxycodone, the last 2 months have seen sizable increases in Oxycodone scripts at your store?

Beau and Brian,

This is Mays report, and as expected the same two stores are on this list for Oxycodone. Have either of you received any feedback from these stores around dispensing habits, GFD policy execution, doctors prescribing more oxy, new pharmacists working at their locations, etc.?
